Pathogen surveillance data is updated weekly. New reports may be added up to and including week 14 of 2022 from the submissions provided by the (current and new) laboratories participating in pathogen surveillance. In any case, the figures for week 15 (2022) are not yet complete. In addition, numbers per week may differ from previous publications due to updates of sample collection dates or reclassification of the sample in the registration system (source and contact tracing instead of random sampling). These weekly figures are updated retroactively.
