

## **Corrigendum CCE Status Report 2015**

### **Page 15:**

Table 1.1 lists, *inter alia*, the number of ecosystem records. It is not clearly indicated that the numbers are per thousand; the column headings that list '# recs' (for number of ecosystem records) should read '\*1000 recs'.

### **Pages 39, 81-94:**

France has corrected their critical loads data: ecosystem records for the coastal zones (EUNIS class B) have been deleted due to the lack of reliable input data. Thus, in annex 2A (p.39) the line with the 2,695 ecosystem records should be deleted. See also the updated national report of France (unedited by the CCE) replacing the one on pp. 81-94.
