*The numbers for the UK variant with E484K mutation are included in the total numbers for the UK variant (B.1.1.7).

Pathogen surveillance data is updated weekly. New reports may be added up to and including week 16 of 2021 from the submissions provided by the (current and new) laboratories participating in pathogen surveillance. In any case, the figures for week 17 are not yet complete. In addition, numbers per week may differ from previous publications due to updates of sample collection dates or reclassification of the sample in the registration system (source and contact tracing instead of random sampling). These weekly figures are updated retroactively.
