HPV

HPV

### 14 years

MenACWY

### Extra DTaP-IPV-Hib-HBV vaccination at the age of 2 months

A child receives an extra vaccination at the age of 2 months if the mother was not vaccinated against whooping cough (pertussis) during pregnancy, and in case of special circumstances. The doctor or nurse at your well baby clinic will discuss this with you.

### Abbreviations and what they mean

D Diphtheria  
T Tetanus  
aP Pertussis (whooping cough)

IPV Poliomyelitis  
Hib Haemophilus influenzae type b
